PROFILE

With years of extensive experience in cybersecurity, I began my journey as a **penetration tester**, later advancing to the role of a **senior security analyst**. My career then took me to the management level, where I served as an **Information Security Officer** for a global enterprise.

Following this, I transitioned into **independent freelance consulting**, specializing in **short-term projects** and **consulting** opportunities. I hold numerous certifications, including GIAC Certified Detection Analyst (GCDA) and **CompTIA Advanced Security Practitioner (CASP)**, and I am skilled in Python and various security tools.

My commitment to cybersecurity extends to volunteering as a lecturer for Czechitas, where I play a vital role in raising cybersecurity awareness.

Furthermore, I am a **vetted expert within global expert groups**, such as the **United Nations Development Programme's GPN/ExpRes Roster** and **EU CyberNet**, showcasing my exceptional expertise and dedication to advancing cybersecurity on a global scale.

I always seek new consulting opportunities. Looking forward to meeting you.

PROJECT EXPERIENCES HIGHLIGHTS

- Co-creation of NPO cybersecurity course focusing a SOC analyst content
- Establishment of cyber threat intelligence capabilities
- ...
- Deployment of modern agent-based vulnerability scanning capabilities
- CIS baselines deployment within Active Directory

ORGANIZATION MEMBERSHIP

Pre-vetted expert within GPN/ExpRes roster in United Nations Development Programme   Aug 2023 - Present

The GPN/ExpRes Roster is a deployment mechanism maintaining pre-vetted consultants for immediate support to UNDP HQ and Country Offices. The Roster holds over 4,000 vetted experts. Many of the experts on the GPN/ExpRes Roster are the best in their fields with ranging levels of expertise starting at P-3 (international professional) level. All experts on the GPN/ExpRes Roster have been thoroughly vetted by UNDP s technical teams.

Vetted expert in EU CyberNet   Jun 2023 - Present

Cybersecurity experts are the core of EU CyberNet and instrumental to the objective of building and promoting the model of an open, free, secure and stable cyberspace, based on the vision and values of the EU. They are a group of people who are ready to share their experiences, to contribute to capacity building initiatives and to provide their expertise to EU's efforts in the partner countries. This also provides for a better use of the valuable human resource and know-how that forms a critical building block of the Union's daily cyber security.
